

2.6. Updating software and firmware

ECH2O Utility can also be used to check for and download updates device firmware when internet is available on the computer being used. To check for a newer version of the ECH2O Utility, choose "Check for ECH2O Utility Updates" from the Help menu. To check for updates to the firmware in your logger or Data Station, choose "Check for Device Firmware Updates" from the Help menu. Most of the ECH2O devices support user-updateable firmware (Decagon Devices, Inc. 2013). You can also view the latest information about the ECH2O software and firmware updates by visiting <http://www.decagon.com/support>.
