File Edit Format View Help

```
1. Ask for a start and end value
2. Only proceed if start <= end, otherwise
   re-prompt for start and end value
3. Print the table of
   start^0.....start^5
   .....
   .....
   end ^0 .....end ^5

4. Give the user a chance to repeat the entire
   process or stop if they enter s
```
